

YOU ARE NOW PROTECTED.  
FROM FLEAS AND TICKS. YEAR-ROUND.

Your vet has administered **BRAVECTO**<sup>®</sup> injectable  
flea and tick treatment to your dog.  
This is your guide to **BRAVECTO** injectable.

**BRAVECTO**<sup>®</sup>  
*injectable*

# FLEAS AND TICKS ARE A HEALTH RISK TO PETS AND PEOPLE.

Bloodsucking parasites are much more than a nuisance, they are an ongoing health threat to your dog and pose a health risk to your family too.

---

## FLEAS.

Can lead to problems, such as tapeworm infections, skin allergies and skin infections.

Heavy infestation can lead to severe blood loss and anaemia.

## TICKS.

Can carry diseases, including Lyme disease and babesiosis.

### **Fleas and ticks persist through every season.**

Protecting against fleas and ticks for only one or two seasons leaves gaps in protection, exposing your dog to the risk of infestation and disease.

June July August

**SUMMER.** The sunshine, heat and BBQ smells are everywhere. So are fleas and ticks.

**AUTUMN.** As your dog rolls in the autumn leaves, fleas and ticks remain active, looking for their next meal.

September October November

December January February

**WINTER.** Brrrr. The temperatures drop, the heating turns up, and fleas love getting cosy in your dog's bed. Ticks are still around too, ready to hitch a ride on your winter walks.

**SPRING.** The days warm up and flowers start to bloom. Now is the perfect time for outdoor adventures. For you, your dog and fleas and ticks too.

March April May

# BRAVECTO INJECTABLE LEAVES NO GAPS IN PROTECTION THROUGHOUT THE YEAR.

It is the only flea and tick treatment to offer 12 months  
of continuous protection from just one dose.

## LESS ITCHING.

- ✓ **Immediate and persistent flea-killing activity**  
for 12 months
- ✓ **Persistent tick-killing activity** for 12 months
- ✓ **Reduces the risk of diseases** carried by fleas and ticks  
for up to 12 months

**Protection through  
the seasons for you,  
your pet and your family.**

**BRAVECTO<sup>®</sup>**  
*injectable*

# MORE PLAYING.

**Provides convenience and peace of mind** with just one injection per year

**Reduces the opportunity for missed doses** that might occur with treatments that require more frequent dosing

**Gives protection all year round**, so you are ready for wherever your adventures may take you

## COMES WITH A 1-YEAR CRYSTAL CLEAR GUARANTEE.

The Crystal Clear Guarantee is your assurance of protection for your pet with **BRAVECTO** injectable.

If you have any concerns related to your protection during the 12-month period, such as discovering an engorged tick, you are guaranteed a follow-up veterinary consultation and action plan.

Since **BRAVECTO** injectable is scientifically backed, it is unlikely that you will need it. But just in case, this guarantee has got you covered.

**Terms and conditions apply** and are available from your veterinary practice team.

# PROTECTING YOUR DOG THROUGH EVERY SEASON HAS JUST GOT EASIER.

**BRAVECTO** injectable is unique – it is the only flea and tick treatment for dogs that provides a full year of protection with just one injection.

The unique crystallised formulation of **BRAVECTO** injectable contains the active ingredient, fluralaner.

Fluralaner crystals are slowly absorbed into your dog's bloodstream, providing continuous protection against fleas and ticks for one year.

Although you may see fleas and ticks, they will be killed quickly if they attempt to feed on your dog, as they will ingest fluralaner from the blood.
